**Question:**  
 How can we help?

**Answer:**  
 By providing you with  
 an environment that  
 allows you to help  
 yourself!

# The Disability Solutions Contractor

At A. Hildebrandt Contracting we offer many services to improve the quality of life for the elderly and those with disabilities. Whether it is the installation of a seemingly simple grab bar or the renovation of an entire home to make it wheelchair accessible, we have the knowledge and experience to make your project a success. We work with manufacturers and distributors directly to ensure that you receive quality products and professional installation, designed specifically for your needs. In the health care industry, having a team that works together is important. A. Hildebrandt Contracting will work with your team of doctors and healthcare professionals to formulate a design that is based on your needs.

## About Us

A. Hildebrandt Contracting was founded in order to meet the need for a disability contractor in St. Louis, Missouri. After being approached by a long time customer and friend to coordinate the installation of home access equipment in his home, Andrew Hildebrandt discovered that there was a lack of information and qualified disability contractors in the area. Although our friend is no longer with us, the joy that we experienced by helping improve his quality of life lives on. There is no greater feeling than providing another human being with the tools to help themselves.

## Financial Assistance

The process of making a home suitable for a person with a disability can be expensive. A. Hildebrandt Contracting has multiple resources that can help you obtain the equipment you need at a reduced rate and sometimes even free. For more information or a free evaluation, call us at 314-686-9720.

**You wouldn't choose just any Doctor. Why would you choose just any Contractor?  
A. Hildebrandt Contracting is "The Disability Solutions Contractor" In St. Louis!**
